

LIGHT IT UP. Anywhere you want.

IllumiSign® from Sol

On or off the grid.

Your message. Your choice.

Reliable. Renewable. Remarkable.

IllumiSign® LED backlit sign solution

The better, brighter light bar

UNIFORM LED BRILLIANCE

Compared with fluorescent tubes, IllumiSign's LED design eliminates hot spots, improves visibility and offers a level of durability that's as good as it gets.

EASY TO INSTALL

Other lighting products require lengthy, costly electrical wiring in the shop when the sign box is built. Sol's IllumiSign® LED systems are strictly plug-and-play, with no additional wiring required. You save on labor and assembly costs.

ENERGY EFFICIENT

IllumiSign® uses as little as 10% of the electricity of conventional lighting, providing significant operational savings.

MAINTENANCE FREE

Compared with conventional lighting, the savings on maintenance alone can pay for the Sol IllumiSign®.

THE EXCLUSIVE SOLAR OPTION

Only Sol offers the incredible flexibility of solar power, allowing IllumiSign® systems to be installed off the grid, whether that's desired or required. Brilliant illumination and reliable performance—wherever you need it. No electricity? No problem!

BUILT TO ENDURE

IllumiSign® is ETL listed to the UL 48 standard, made with a rugged aluminum housing. LEDs are rated to 65,000 hours (L70) TÜV listed to UL 1598:02.2004 and CSA C22.2 No. 250.0-04 of brilliant illumination. Best of all, IllumiSign® carries an industry leading FivePlus™ year limited warranty, thanks to proven reliability.

Reliable. Renewable. Remarkable.
